

every level of government

5. **What is your position on immigration policy and sanctuary cities?**
We should have a zero tolerance level on immigration. Everyone should be welcome if they want to assimilate themselves to our way of life. English is our preferred language. I do not believe in immigrants babies becoming citizens at birth. There should not be any class of people who should be allowed to function in our society as citizens if in fact they are not, i.e. sanctuary cities.
6. **What is your position on US relations with Israel?**
If we are to follow scripture, then we have no choice but to remain a friend to Israel. I believe those who do not, will face destruction for that reason alone.
7. **What is the role of the judiciary in our political system?**
As it pertains to laws, the judiciary system should not make laws. It should interpret them and apply them to settle disputes. As it applies to structure, we have the Executive branch (headed by the President), the legislative branch (made up of Congress and House of Representatives), and judiciary (comprised of Supreme Court and lower courts). The role of the three branches is to protect us from the powers of each separate branch.
8. **What is your position on revenue sharing (requiring the wealthy to pay their "fair share" through taxes in order to help the less fortunate)?**
I think the wealthy pay more than their fair share. It is a travesty that the lower 50% of our population pay no tax but yet receive checks from our government, mostly paid on the backs of the top 10% in this country. God said there will always be poor among us. He also said a slacker will go hungry.
9. **What is your position on 2nd Amendment rights?**
In short, I believe my right to keep and bear arms is the only thing that keeps a dictatorship from attempting to change my life.
10. **How would you address the most important issue facing your constituency today?**
In Upshur county, we have two important issues. First is the reputation and second is annual budget. Along with the indictments of our county officials is the sour reputation our GOP is facing in light of our chairman and his antics. Our county commissioners have not brought us a balance budget the past two years and have depleted our reserve funds by nearly three million dollars during that time. The county is broke and no one wants to admit it.
